

MOU SIGNED

PARTNERS FOR GREENER FISHING

Tamil Nadu Fisheries Development Corporation, Indian Oil and GreenGlide sign an MoU to bring LPG-powered outboards to fishing boats

Signatories from TNFDC, IndianOil and GreenGlide exchange the MoU.

Tamil Nadu Fisheries Development Corporation Ltd., Indian Oil Corporation Ltd and GreenGlide LPG Marine Outboards signed a tripartite Memorandum of Understanding to promote LPG-powered outboard engines for fishing boats.

The MoU brings together the state's fisheries corporation, the supplier of Indane LPG and the maker of the LPG outboard. GreenGlide's four-stroke engines, in 9.9 HP and 15 HP, cut running costs by up to 60%* and emit 82% less HC+N0x than the EU limit, as tested at ICAT, Manesar.

Energy Partner

IndianOil will act as the Energy Partner, utilising its extensive LPG infrastructure, technical expertise, and robust supply network to ensure dependable fuel availability and safe dispensing systems for marine use.

Government Support

Tamil Nadu Fisheries Development Corporation Limited (TNFDCL) will play a key role in policy facilitation, stakeholder coordination, and implementation of regulations for the fishing community across the state.

Engine Partner

HT Systems Private Limited (GreenGlide) will supply advanced LPG-powered marine engines and related technology solutions specially designed for coastal and fishing operations.

*Indicative; depends on hours of use and on fuel and LPG prices.

What it means for fishermen: see overleaf.

Supporting India's Fishing Community

The GreenGlide programme is designed to change the equation with a practical, scalable solution built for Indian operating realities. LPG-powered outboards that deliver almost 60% savings over typical petrol operating costs, while offering far cleaner emissions profile and a materially improved operating experience in the marine environment.

THE ENGINE

GREENGLIDE LPG OUTBOARDS

9.9 HP and 15 HP

Electric/Rope start.

Tested at ICAT to ISO 18854
HC+NOx 82% below EU limit.

India's traditional fishermen are vital to coastal food security and the blue economy, yet many remain exposed to high and volatile petrol prices, as well as escalating maintenance burdens.
